

## Lead DevOps Guru / CTO

### Opportunity

An exciting opportunity has arisen for a **Lead DevOps Guru with CTO tendencies** to join the Axis12 team! We're looking for a talented and driven individual who will play a key role in delivering some of the best online projects for cultural institutions including Southbank Centre, Somerset House, British Film Institute, Tate, Kew Gardens, Royal Museums Greenwich, the Equalities and Human Rights Commission and Civil Service Learning.

You will work in an Agile project management environment, will be involved in multiple projects at any one time and will work closely with a talented team to deliver top products for some truly great institutions.

The successful candidate will be a strong communicator, excellent multi-tasker, eager to solve problems and build their skillset. You will enjoy working in a team environment and thrive on varied and interesting challenges.

This is an exciting opportunity to work in an Agile environment with some truly amazing clients and some great new technology.

### Key responsibilities

- Forging the technical direction of the company
- Defining the strategy and vision for the infrastructure for the next 12 months and beyond
- Driving and define service improvement programmes. Planning for medium- and long-term delivery of services that will involve research, experimentation and writing code
- Leading a team of two other System Administrators to help deliver client and internal projects
- Developing and training staff under your management
- Driving day to day operations. Participating fully in day-to-day hosting and support operations, responding to client needs

- Managing our kit in 2 datacentres. This could involve physical installation of new hardware / repairs to existing hardware
- Working on client projects to deliver projects that will involve high availability, disaster recovery planning, multiple datacentres and a range of software technologies
- Managing your own time, working in an Agile environment, reporting to the Directors

### You'll have:

- Experience, ability and/or an appetite for making key technology decisions that affect the direction of the company
- An interest/infatuation with new technology and a desire to experiment and prototype new solutions
- Solid and demonstrable Linux administration experience
- Docker and Kubernetes (we have recently moved large parts of our infrastructure to use Kubernetes)
- KVM
- Configuration Management tools like Puppet and Ansible
- LDAP
- Monitoring tools like Nagios/Centreon
- AWS exposure

### It would be nice if you had:

- MongoDB
- Apache Solr
- RabbitMQ
- MuleSoft
- Varnish

### You'll receive:

- Flexible working environment including occasional remote working when required
- Flexible start – finish times
- The chance to work on both client facing projects and internal incubator products
- Private healthcare with Vitality
- Holiday allowance that increases with longevity
- Company contributions towards gym memberships
- Optional Pension Plan
- Regular staff outings and social events (we've gone to Ibiza for the last few years!)
- Cycle to work scheme
- In-house training and development opportunities
- Well supplied kitchen with coffee machine / refreshments
- Central London location

Want to join us? Send a CV and cover letter to [jobs@axistwelve.com](mailto:jobs@axistwelve.com).

Please note that only applicants who are eligible to work in the UK, will be contacted as part of the shortlisting process. Strictly no agencies.
